

## Alumni Speaks (2009-10)

Sandeep

### Textile Technology & Management (full time)

In a span of one year, a vast field like textile technology and its various aspects such as spinning, weaving, processing and quality control are well covered in this program. The curriculum is developed as per the textile industry requirements and provides a gateway to the Indian textile industry.

Adesh  
Kumar

### Garment Technology & Management (full time)

Detailed curriculum and excellent lab facilities are the unique features of this program. In addition to garment manufacturing technology, textile technology aspects and the basics of management also help in our career.

Geeta  
Sharma

### Apparel Merchandising & Export-Import Management (full time)

The program is a complete package which not only includes core merchandising functions but also manufacturing technology, marketing, export-import and retailing. All these inputs are a must for an aspiring merchandiser in today's fiercely competitive business environment.

Ankur  
Bhardwaj

### Apparel Design & Quality Control

The program provides excellent exposure on latest pattern making softwares on one hand, and quality control aspects on the other. This has helped me a lot to get a job in the apparel industry.

Sakshi  
Shreshtha

### Textile Design & Quality Control

The program provides comprehensive exposure on different CAD software such as dobby, jacquard, printing and embroidery which are in great demand in the textile industry. Economic program fee, compared to other institutes, are another plus point for all the NITRA programs.

Om Dutta  
Bansal

### Apparel Machine Engineering & Maintenance

The actual strength of NITRA programs are not only the updated curriculum and excellent infrastructure facilities, but also the faculty who teaches theory and practical aspects with equal flair.

Saurabh  
Jain

### Garment Dyeing, Drycleaning & Finishing Technology

It is difficult to find a training institute for such a specialized area like garment dyeing, drycleaning and finishing. Only at NITRA have I found such a unique combination. On top of that, the sophisticated garment finishing lab, where trainees are exposed to latest technology, is a class of its own.

Mohit  
Prasad

### Quality Evaluation of Textiles & Garments (DLP)

The QETG (DLP) program is very helpful for those who are engaged in QC operations. The practical training as well as the contact classes at NITRA is very useful and definitely very beneficial.

Reenu  
Tanwar

### Apparel Merchandising & Export-Import Management (DLP)

This program offered by NITRA is very helpful for the working executives. Contact classes are very lively and study materials provided are quite comprehensive. It is sure to set one's confidence level on a high note once back on job and ensures career enhancement.
