

**NITRA Publications** - During the last 30 years, NITRA has published a number of publications in the form of books, survey reports, workshops/seminar proceedings, training programmes, manuals, technical CD's and cassettes on the following subjects:

- 1 **Fibre & Yarn**
- 1 **Fabric**
- 1 **Processing**
- 1 **Knitting**
- 1 **Technical Textiles**
- 1 **Quality Evaluation & Statistical Applications**
- 1 **Maintenance Management**
- 1 **Engineering & Environment**
- 1 **Human Resource Management**
- 1 **Information Technology**
- 1 **Management**
- 1 **General**
- 1 **Inter-Firm Comparison Survey**

### TERMS AND CONDITION

#### Orders and Payments:

Purchase Orders may be sent to the Librarian, **NITRA, Sector 23, Raj Nagar, Ghaziabad-201002 (U.P)**. All orders must be accompanied by **advance payment** in the form of D/Draft in favour of **NITRA, payable at Ghaziabad**. The prices are indicated against the titles. **Postage will be extra** and not included in the prices. An amount of Rs. 20/- per publication shall be charged for registered mail and Rs. 50/- shall be charged for courier.

#### Discount for Member Mills and Book Sellers:

A discount of 20% shall be offered to our Member Mills & Book Sellers. However a discount of 30% shall be offered on purchase orders exceeding Rs. 25,000/- (Cost Price).

#### Discount for Students, Libraries and Institutions:

A discount of 10% shall be offered to Students, Libraries and Institutions. However, a discount of 20% shall be offered on purchase orders exceeding Rs. 25,000/- (Cost Prices).

## PUBLICATIONS

S. NO.	TITLES	YEAR	AUTHOR(S)	PRICE (In Rs.)
<b>FIBRE &amp; YARN</b>				
1.	<b>Sewing Threads</b> Era has gone when cotton threads were dominant and technology adopted to manufacture them were kept highly secret. Spun polyester threads which took the status of cotton threads, now have become very common and are manufactured by even medium and small scale units. This book has gone many steps ahead by way of illustrating the details of advanced threads responsible for performing well in tough/special conditions. The book also enables to peep into the minute details of chemical structure of raw materials used in making high performance and speciality sewing threads.	June 2005		750/-
2.	<b>Control of Hard Waste &amp; Rejections Reduce Losses in Spinning</b>	2002	Work Shop Proceedings	150/-
3.	<b>Emerging Trends and Technologies in Manufacturing of Synthetic Fibres</b>  This book of 170 pages contain information pertaining to latest technologies on poly-ethylene terephthalate filament production, trends in products and end uses of nylon, speciality spinnerettes for synthetic fibres, value addition by spinning polyester fibre blends, filament yarn testing and quality control,	2001	Workshop Proceeding	200/-

S. NO.	TITLES	YEAR	AUTHOR (S)	PRICE (In Rs.)
4.	<p>spinning polyester fibre blends, filament yarn testing and quality control, spunlace and spunjet technology for producing non-wovens, polyester staple fibre scenario &amp; trouble shooting and texturising industry in India.</p> <p>Authors of these papers are from large over-seas groups and Indian groups like Zimmers (Germany), Rieter (Germany), Wetzel (Switzerland), Indo Rama Synthetics, Himson Industries, Modipon, IIT Delhi and NITRA.</p> <p><b>Norms for the Textile Industry (Spinning)</b></p> <p>Norms for the textile industry (spinning) is the result of joint efforts of the four Textile Research Associations namely ATIRA, BTRA, NITRA &amp; SITRA and is unique in the sense that such type of publication is not available in any other country. The book contains norms on productivity, quality, manpower requirement &amp; engineering related aspects for 100% cotton, blended, 100% man-made and rotor spun yarns. The information contained in this book is the result of various inter-firm surveys, consultancy work and shopfloor studies and hence can be used as a benchmark by the spinning mills to evaluate their own performance viz-a-viz the norms and take necessary actions whenever required. The present book of norms is much more comprehensive with lot of new information which was not available in the earlier norms brought out about a decade ago.</p>	2001	Joint Publication of ATIRA, BTRA, NITRA & SITRA	500/-

15.	decentralized power loom sector giving an exhaustive account of small power loom units and details of their products. This directory is available in both book form and CD form. This directory will be useful for sourcing of the fabric for domestic as well as for exports. <b>CD on Fabric Sourcing Directory of Northern Region - 2002</b>	2002	R.P. Sharma, Dr. B.K. Sharma	150/-
16.	<b>The Market for Fabrics in Vietnam and Cambodia 2002</b>  The report prepared by NITRA in collaboration with Protech India Ltd., is of great help to fabric manufacturers of India to tap the relatively untapped potential markets in these two developing countries. The study has been based on a comprehensive field survey lasting for a month followed by intensive test research and interface with Ministries and business houses of Vietnam and Cambodia. The samples have been drawn from commercially most happening places like Ho Chi Min city and Hanoi in Vietnam and the capital city of Phnom Penh of Cambodia. Utmost care has been taken to approach a formidable sample size and to ensure that all categories of garment units are covered so as to maintain the representative character of the industry. And finally, the data collected has been compiled, edited, coded, tabulated, analysed and structured in the form of the said report.	2001	NITRA Survey Report	5000/- (US \$ 150)
17.	<b>Denim : A Fabric for all Dyeing, Weaving &amp; Finishing</b>	1996	Dr. M.S. Parmar, S.S. Satsangi, Dr. Jai Prakash	500/-

( 4 )

S. NO.	TITLES	YEAR	AUTHOR (S)	PRICE (In Rs.)
18.	This book informs about Indigo dyeing, weaving, finishing and testing procedures and covers the type of defects arising during dyeing process alongwith its rectification methods. Book also deals with recent developments on denim processing. The testing of colour depth by Computer Colour Matching system and different types of old & new methods of testing for the purity of Indigo dye are dealt with. The book is fully supported by illustrated charts & diagrams  <b>Vastra Sanrachana (Design)- (Hindi)</b>  This book gives an idea about the manufacturing of the fabric of different style, i.e. for clothing, tapestry or upholstery, canvas, terry-towel etc. It covers all sorts of fabric.  It gives an idea of parameters to be considered while making fabric in different style taking into account the texture of the fabric subject to end use like yarn count, reed pick, reed space cotton/synthetic and all sorts of calculation for making the fabric. It also gives an idea of basic weave and different common fabric with reed, pick, warp-weft.  This book is useful to all the persons who are working in weaving loom shed, may be weaver/jobber/supervisor and also to those persons who are in textile trade.	1988	S.K. Srivastava	40/- (No discount)
19.	<b>Weaver's Guide Book (Hindi)</b>  This book gives the primary knowledge	1987	S.K. Srivastava, I. Grover	20/- (No discount)

	<p>of the powerloom like different types of motion and the components and how they operate crucial settings and their importance in critical maintenance aspects.</p> <p>It gives an idea of the different types of weaves, the damages in the fabric and their remedies. It also educates you how to increase the productivity.</p> <p>This book is useful to beginners like weaver, jobber and supervisor in centralised or decentralised sector.</p>			
<b>PROCESSING</b>				
20.	<b>Vastron Ki Rangai, Chhpai Evam Finishing</b>	2006	Dr. M.S. Parmar	400/-
21.	<b>Norms for the Textile Industry (Chemical Processing)</b>	2001	Joint Publication of ATIRA, BTRA, NITRA & SITRA	250/-
	<p>The book on norms is a unique contribution from the four TRAs and is based on the results of several inter-firm surveys, shop-floor studies and consultancy work over the years.</p> <p>These norms cover the quality, productivity of machines and manpower requirement as per job. The norms can help the textile wet processing mill to obtain optimum techno-economic benefit by controlling process, machines and man-power. These norms also suggest some preferred process sequences for wet-processing of textile material.</p>			
22.	<b>Cost Reduction Measuring in Chemical Processing of Textiles</b>	1989	Work Shop Proceedings	200/-

<b>KNITTING</b>				
24.	<b>Weft knitting Technique : an Introduction (Hindi)</b>	1999	Dr. M.S. Parmar	200/-
	<p>This book gives an introductory knowledge of weft knitting techniques. Different types of knitting machines like single jersey, double jersey and others are also discussed. This book also covers different defects arising during knitting process. Different types of structures are also discussed. This book is fully supported by illustrated diagrams.</p>			
25.	<b>Processing of Cotton Knitted Fabrics</b>	1998	M. Chakraborty, Amit Dayal, M.L. Gulrajani	350/-
	<p>The Coverage of the book includes a theoretical concept of cotton knitted processing with number of illustrations of various latest knitting machines. Readers will get a concise knowledge of various dyeing practices, finishing, shrinkage behaviour and quality control area. Besides it has also covered the area of latest machinery development and testing of processed knit goods. This book will be helpful to the Managers, Students and Shop-Floor technicians.</p>			
26.	<b>Suti Va Mishrit Hosiery Vastra Key Processing (Hindi)</b>	1997	M. Chakraborty, Maheswar Singh, D.K. Sharma	200/-
	<p>The book is for shop floor technical personnel engaged in cotton knitwear processing. They can get sufficient information regarding basic</p>

	been prepared by collecting information from various sources so that they can be used as ready reference to people working at shop-floor level as well as students aspiring to become proficient in garment processing. The booklets describe the quality requirements, procedures to evaluate the quality, Do's and Don'ts, storage and handling procedures. Information relating to the effect of input material quality on the finished product quality has also been discussed in these booklets. Besides, the series also describes operational & maintenance procedures and energy conservation techniques of utilities employed in garment factories.

S. NO.	TITLES	YEAR	AUTHOR (S)	PRICE (In Rs.)
	<b>Tablet-II</b> : Failure mode and effect analysis (FMEA) : An Essential tool for decision making in textile & garment industry.	2002	Dr. A.K. Srivastava, R.K. Gaur, R.S. Yadav	35/-
34.	<b>Control of Un-Evenness (%), Imperfections and Yarn faults:</b>  The book covers concept, significance and control of unevenness, imperfections and other yarn faults. The other aspects covered are critical process parameters and their settings, quality norms as per uster statistics and joint norms. The findings of the study "effect of shore hardness on yarn quality" has been also included.	2001	A.K. Singh, Vivek Agarwal	150/-
35.	<b>Quality Evaluation of Textiles</b>  The book contains concepts of physical and chemical quality evaluation of fibre, yarn and fabric. The book also covers textile testing system and procedures for different tests. The causes and remedies of various fabric defects have been exclusively covered.	2002	A.K. Singh, Dr. M.S. Parmar	150/-
36.	<b>Measurement and Control of Uster Un-evenness, Yarn Faults and Hairiness</b>  The book elucidates the following aspects : H Yarn Evenness and its importance H Process variable and their impact on un-evenness of yarn H Control of imperfections and yarn faults	2001	A.K. Singh, Vivek Agarwal	150/-

37.	<b>An Evaluation of Yarn Quality for Spinning Mills with TRA Norms and Uster Statistics</b>	2001	Dr. A.K. Srivastava, R.K. Gaur, R.S. Yadav , Dr. B.K. Sharma	325/-
38.	<b>Textile Testing- Systems &amp; Produres</b> <b>Part- I : General</b> <b>Part- II : Fibre</b> <b>Part - III : Yarn</b>  <b>Part I</b> covers general aspects like organisational structure for quality control deptt., humidity, sampling procedures, use of statistical techniques etc. <b>Part II</b> and <b>Part III</b> give detailed information on fibre & yarn properties, their significance & test sampling methods.	1999	A.K. Singh, Vivek Agarwal, R.K. Sharma	150/- 150/- 200/-
39.	<b>Textile Testing Systems &amp; Procedures (Chemical)</b>  The book is suitable for the persons engaged in day to day testing in chemical laboratory. The areas covered are testing of dyes, chemicals, auxiliaries, finishing/ sizing, chemical blend analysis, fastness properties, process control. Besides these, testing through Computer Colour Matching (CCM) and interpretation are also given. The book gives a fairly broad coverage and can help a person to widen his activities of testing in a textile mills.	1998	M. Chakraborty, D.K. Sharma, Maheshwar Singh	200/-

S. NO.	TITLES	YEAR	AUTHOR (S)	PRICE (In Rs.)
40.	<b>Application of Statistical Techniques in Textile Industry</b>	1997	Work Shop Proceedings	280/-
41.	<b>Quality Evaluation of Fabrics &amp; Sewing Thread for Export Garments</b>	1990	Work Shop Proceedings	290/-
42.	<b>Consumer Preference in TANDA Textile Market</b>	1988	Work Shop Proceedings	280/-
43.	<b>The Contribution of Yarn Faults and Processing Parameters to Fabric Defects and Value loss</b>			
<b>MAINTENANCE MANAGEMENT</b>				
44.	<b>Machinery Maintenance Manual (Hindi)</b> i) Card ii) Comber, Draw Frame & Speed Frame III) Ring Frame  These books are simple as these are written in easy spoken Hindi using terminology prevailing at shopfloor in what so ever language it is. The contents highlight important aspects of machinery maintenance-its planning & monitoring, maintenance of bearings, use of lubricants, belts, different mechanisms for transmission of drive etc. In addition, specific know-how regarding machine, its critical components, crucial settings & gauges influencing quality and productivity. Role of fitter in achieving accuracy in maintenance operations are also dealt with.	1993	Dr.S.K.Srivastava, U.C. Sharma, A. Pal	55/- 55/- 55/- (No dis-count)
45.	<b>Maintenance Schedules and Practices in Spinning for mills engaged in Cotton Fabric Export</b>	1993	Joint Publication of ATIRA, BTRA, NITRA & SITRA	100/-

S. NO.	TITLES	YEAR	AUTHOR (S)	PRICE (In Rs.)
	The Book provides information regarding maintenance schedules being followed by different sectors of spinning industry. Maintenance system and practices in various mill were thoroughly studied and demonstrated in details			
46.	<b>Productive Maintenance to Achieve Quality Excellence</b>	1987	Work Shop Proceedings	150/-

86.	<b>An Introduction to Computer Beginners</b>  Today, since computer is being used in every walk of life, it becomes necessary for everyone to have a proper knowledge of computer. Keeping this in mind, Software Development Centre NITRA, has put considerable efforts to bring a book on computer.  All the concepts presented in the book are illustrated with suitable examples and figures to enable the readers to use the book effectively for self-study.	2000	Dr. B.K. Sharma, Avnish Sharma, Vikas Sharma, Indu Bidani	200/-
87.	<b>Concepts &amp; Applications of ERP for Textile Industry</b>  The book is proceedings of workshop which was organized in Nov. 2000 jointly by NITRA & Avadh Texwood Pvt. Ltd. With a basic objective of creating awareness about the concepts & applications of ERP among the textile mills. The book contains papers on various aspects of ERP such as areas of IT applications in textile industry, ERP - a need of the hour, various requirements & implementation phases of ERP, projections of 21st century in regard to use of e-business/ commerce and also a brief model of ERP package.	2000	A. Pal , U.C. Sharma	100/-

103.	<b>A Survey Report on marketing information system in Textile Mills</b>  The marketing information system is not only an important production factor, it can also be regarded as a success factor for all functions in textile industry. The marketing information system is therefore a substantial component within a concept which we term as "Integrated Product and Market Management System" for textile industry. NITRA has identified the problems and accordingly NITRA's Operation Research Division decided to develop the necessary marketing information system in multidirectional fields to assist in achieving objectives for better decision making in this area.	1996	A.K. Srivastava , R.K.Gaur, Dr. B.K.Sharma	200/-
