

NITRA – NJB Jointly Organise Seminar on Development of Jute Composite for Automotive Acoustic Insulation & Other Uses

Northern India Textile Research Association (NITRA) and National Jute Board (NJB) jointly organized a seminar on Development of Jute Composite for Automotive Acoustic Insulation & Other Uses at Hotel IBIS, New Delhi Aerocity on Friday, 2nd August, 2024. The seminar was organized to appraise the industry about the developments that is made by NITRA scientists in this direction.

Dr. Arindam Basu, Director General, NITRA in his welcome address elaborately spoke about how NITRA can make substantial contribution in order to extend the potential of jute fibre through research and developments. Dr. Mahadeb Datta, Jt. Director (Technical), NJB made a presentation on diversified use of jute as an eco-friendly natural fibre. Sh. R.K.Gaur, Astd. Director, NITRA made a brief presentation on NITRA's works and achievements.

In the second session, NITRA's Principal Scientific Officer Dr. Neha Kapil presented research findings on the project 'Development of Jute Composite for Automotive Acoustic Insulation & Other Uses.' Following which, Dr.M.S.Parmar, Director, NITRA gave another presentation on the project NITRA Development on Jute-Cotton based Molten Metal Splash Resistant Workwear. Technical discussion took place after both the presentations.
