# TECHNICAL SPECIFICATIONS

## (Volume-II)

**Name of Equipment : Thermal Analyser**

**Qty: 1 Set**

The specifications are as follows: The Thermal Analyser (**Heat Flow Meter**) is designed to measure the **thermal conductivity** and **thermal resistance** of materials through a setup that includes a cold and hot plate integrated with **heat flux transducers** that measure the heat flow between the plates. The primary objective of this instrument is to assess the thermal conductivity and thermal resistance properties of multilayer fabrics, garments, and other materials used in **protective textiles**, particularly for **defence personnel**. By applying a controlled temperature difference between the plates, the instrument enables the measurement of heat flow through the material placed between them.

This Heat Flow Meter will provide a rapid and precise means of determining the **steady-state thermal transmission properties** of thermal insulations and various other materials. With its advanced technology, the instrument ensures **high accuracy** in testing, making it an invaluable tool for evaluating the thermal performance of materials used in environments where heat protection is critical.

### **Instrument Minimum Specifications:**

1. **Testing Standards Compliance:**
  - The instrument shall test samples in accordance with the latest versions of **ASTM C 518, ASTM C 1784, ISO 8301** etc standards.
2. **Sample Size:**
  - The sample size should be approximately **300 mm x 300 mm**.
3. **Sample Thickness:**
  - The instrument shall accommodate samples with a thickness of **up to 100 mm or more**.
4. **Temperature Range:**
  - The upper and lower plates shall operate within a temperature range of **(-)20°C or lower to 75°C or higher**.
5. **Software:**
  - The instrument shall be equipped with the **latest version of software** for accurate data analysis and reporting.

6. **Control System:**
  - The instrument shall feature a **touch screen or PC control board** for ease of operation.
7. **Laptop Requirements:**
  - A **laptop** (if required) with the latest configuration, including the necessary software to run the instrument, shall be provided.
8. **Printer:**
  - A **printer** shall be supplied with the instrument for printing reports and results.
9. **Calibration Materials:**
  - The instrument shall come with at least **two calibration materials** for calibration purposes.
10. **Calibration Certificate:**
  - A **calibration certificate** or necessary traceability documentation shall be provided along with the instrument.
11. **Thermal Conductivity Range:**
  - The instrument shall come with **necessary accessories** to measure thermal conductivity in the range of **0.005 to 0.3 W/(m·K)** or more.
12. **Chiller Capacity:**
  - The capacity of the **chiller** shall match the requirement of the instrument.
13. **Warranty:**
  - The instrument shall come with a **warranty period of up to 3 years**.

### **General Requirements**

1. Vendor shall be responsible for the installation & commissioning of the complete system at the NITRA site.
2. Comprehensive training of NITRA personnel shall be provided along with operation, and maintenance of the complete system.
3. Detailed checklists and operation manual/s shall be provided for regular operation, operation, and maintenance of the complete system.
4. Necessary Tools and Spares for the operation and maintenance of the complete system shall be provided.
5. Full system drawings, part lists, etc shall be provided.
6. A list of preferably 5 satisfactory buyers of a similar type of instrument/ apparatus may be provided in India or abroad by the tenderer. A letter from the buyer about the satisfactory running of the machine should be provided
